

Coming for a spray tan? Here's all you need to know...

Airbrush Spray Tanning is the perfect way to get that healthy glow with an even finish that lasts around a week! This instant beauty solution is ideal as a pre-holiday treat, for that special occasion or just to get that gorgeous everyday glow.

Before your appointment

Exfoliate your entire body the night before to ensure your skin is smooth and prepped.

Avoid using body lotion as it can create a barrier on your skin and prevent the tan from taking properly.

Wear loose fitting dark clothing. You can leave your own underwear on but we do provide disposable knickers if you'd prefer.

Organise for any facial waxing or eyelash/brow tinting appointments **at least 24 hours prior.**

Let your Body Expert know if you are on any medication as this can affect the development of tan on your skin. **Always let your Body Expert know if you have any allergies.** It is also recommend not to have a spray tan during your first trimester when pregnant.

After your appointment

Allow at least **8-hours development time** so avoid showering, bathing, working out or swimming prior to that.

Avoid using wet or liquid products on your skin directly after the tan.

When you take your first shower, **wash with just water until the water runs clear.** We recommend you use oil free body lotion to maintain your tan and hydrate your skin.
